DETAILED ACTION

Election/Restrictions

1. I. Claims 1-22 are drawn to a protective pad, classified in class 2, subclass, 455.

II. Claims 24-25 are drawn to a helmet, classified in class 2, subclass 410.

III. Claims 26-28 are drawn to a shoulder pad, classified in class 2, subclass 459.

IV. Claims 29-33 are drawn to a method of making a pad, classified in class 2, subclass 267 .
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention I, II, III and IV are structurally different from one another since invention I pertains to a protective pad, invention II pertains to a helmet, invention III pertains to a shoulder pad and invention IV pertains to a method of making a pad.

Art Unit: 3765

3. A telephone call was made to Mr. Eugene Ledonne to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
